

A fire probability model for forest stands in Catalonia (north east Spain)

José Ramon Gonzalez*, Marc Palahi, Antoni Trasobares and Timo Pukkala
Annals of Forest Science 63 (2006) 169–176.

Equation (1) in page 171, was published with a printing error. The corrected Equation (1) is given as follows :

$$P_{fire} = \left(1 + e^{-(b_0 + b_1 \times \ln(\max\{Ele - 6, 1\}) + b_2 \times Dg + b_3 \times G + b_4 \times P_{hard} + b_5 \times \left(\frac{SD}{Dg + 0.01}\right))} \right)^{-1}$$
